

Mitroi Alberto Ionut

.NET Full-Stack Developer

Microsoft Azure and AI Certified .NET engineer delivering scalable, cloud-native systems and event-driven architecture, while building high-impact product experiences with React, Next.js, and Angular.

PROFESSIONAL SUMMARY

Production-proven .NET Full-Stack Developer with Azure + AI certifications, delivering cloud-native systems with C#/.NET and Azure services. I build maintainable backend architectures using DDD, CQRS, clean service boundaries, and production-ready AI integration patterns.

I build and ship end-to-end products with .NET and Azure at the core, paired with modern React, Next.js, and Angular interfaces. My delivery workflow includes CI/CD, observability, and containerized deployments through Azure DevOps, GitHub Actions, and Docker.

.NET-first cloud delivery on Azure • Azure and AI-certified production readiness • DDD, CQRS, and clean architecture • CI/CD and observability mindset

EXPERIENCE

 Oryntech.AI Feb 2026 – Present · 6 months www.oryntech.ai	Craiova, Romania (Remote)
Co-CTO Feb 2026 – Present Co-CTO at Oryntech.AI, an AI automation company that helps service businesses capture, nurture, and convert leads around the clock with conversational AI agents, CRM, and multi-channel marketing automation. - Co-lead the company's technical direction and product strategy, turning business goals into shipped features, agents, and automation. - Designed and built the Oryntech.AI sales and marketing website with Next.js, React, and TypeScript, delivering a fast, responsive, conversion-focused experience. - Built conversational AI agents (voice and chat receptionists plus sales, content, and reputation assistants) that integrate LLMs and real-time speech for 24/7 customer engagement. - Created multi-channel marketing automation across email, SMS, and voice, including appointment confirmations and reminders, invoice follow-ups, and lead-nurture workflows.	
 Encora Inc. Jul 2024 – Present · 2 years 1 month www.encora.com	Craiova, Romania (Hybrid)
.NET Full Stack Developer Oct 2024 – Present Developing scalable features for a distributed UK insurance platform, delivering reliable business workflows across a complex microservices ecosystem. - Implement robust business logic in distributed services while ensuring strong data consistency and operational reliability. - Build asynchronous communication flows between microservices using Kafka, RabbitMQ, and Azure Service Bus. - Work with Event Sourcing patterns using Marten (PostgreSQL) and query operational/search views through Elasticsearch. - Write clean, testable code aligned with CQRS and DDD standards to keep architecture consistency at scale.	
Full Stack Development Internship Jul 2024 – Oct 2024 Gained hands-on experience in building modern web applications within a professional Agile environment. - Contributed to a trading application using .NET 8 for backend services and Angular for frontend delivery. - Learned and applied Clean Architecture principles, Dependency Injection, and OOP standards in day-to-day implementation. - Used Azure DevOps for task management, Git-based version control, and CI/CD fundamentals. - Actively participated in Scrum sprints, code reviews, and daily stand-ups.	

FORVIA HELLA

Nov 2023 – Jul 2024 · 9 months

Craiova, Romania (Hybrid)

Automation & Software Development Internship

Nov 2023 – Jul 2024

Developed automation tools and scripts to optimize team workflows within the automotive sector.

- Built custom automation scripts using Python and C#, reducing manual workload across repetitive engineering tasks.
- Created internal GUI applications with VBA and C# to simplify technical processes and improve team productivity.
- Conducted software testing for automotive control systems to support high reliability and stable validation outcomes.
- Worked closely with engineering teams to analyze requirements and improve testing efficiency.

EDUCATION

Faculty of Automation, Computers and Electronics

Computer Science

ace.ucv.ro

Sept 2022 – Expected Jul 2026

Bachelor of Science in Computer Science

PROJECTS

Oryntech.AI

www.oryntech.ai

The Oryntech.AI product website and AI automation suite I build as Co-CTO: a Next.js marketing site paired with conversational AI agents, CRM, and multi-channel marketing automation for service businesses.

- Designed and built the Oryntech.AI sales and marketing website with Next.js, React, and TypeScript, focused on conversion and a polished, responsive UX.
- Built conversational AI agents (voice and chat) for reception, sales, content, and reputation, enabling 24/7 automated customer engagement.
- Created multi-step marketing automation across email, SMS, and voice (appointment reminders, invoice follow-ups, and lead nurturing) with connected CRM and analytics.

Next.js • React • TypeScript • Tailwind CSS • Framer Motion • Conversational AI • Voice AI • LLM Integration • OpenAI • Prompt Engineering

TopZonal.ro

www.topzonal.ro

A next-generation web and mobile platform connecting homeowners with trusted local professionals, built as a mobile-first PWA with AI-assisted discovery and product-focused UX.

- Built the frontend with React and Next.js on the T3 stack in a scalable monorepo, shipped as an installable, mobile-first PWA.
- Deployed an Azure-based backend using Docker, Azure Container Apps, Azure SQL, Blob Storage, and Azure Key Vault.
- Implemented a RAG-powered AI chat with semantic search over services and professionals for natural-language discovery and context-aware answers.

React • Next.js 14 • TypeScript • T3 Stack • Turborepo • tRPC • Prisma ORM • Tailwind CSS • Clerk Auth • PWA

EShopMicroservices

github.com/AlbertoMitroi/EShopMicroservices

A microservices-based e-commerce project built with .NET 8 and C# 12 to demonstrate modern software architecture, maintainability, and cloud-native deployment patterns.

- Applied Domain-Driven Design (DDD), CQRS, Clean Architecture, and Vertical Slice principles.
- Built scalable service communication flows with RabbitMQ, Kafka, and Redis.
- Used Azure, Docker, and GitHub Actions / CI/CD to model a production-style delivery setup.

Microservices • .NET 8 • ASP.NET Core • DDD • CQRS • Clean Architecture • Vertical Slice • Entity Framework Core • RabbitMQ • Kafka

CERTIFICATIONS

Microsoft Azure Developer Associate (AZ-204)

Credential ID: 42EFC399D66B1E5C

Show certification

Verified Azure development expertise across compute, storage, security, monitoring, and cloud-native application lifecycle.

Microsoft Azure AI Engineer Associate (AI-102)

In progress

Currently preparing for the AI-102 certification path with focus on Azure AI services and production AI integration patterns.

Additional AI Certifications

- Introduction to Generative AI for Software Development** · DeepLearning.AI (Jul 2025) · Credential ID: G503GKSPZ3IO [Show credential](#)
- Advanced Prompt Engineering for Everyone** · Vanderbilt University (Jul 2025) · Credential ID: XPD00TAIAME4 [Show credential](#)
- Gen AI Training Path - Foundational** · Coursera (Jul 2025) · Credential ID: zx9M1u5zTxqfTNbuc88a5w [Show credential](#)
- Generative AI: Prompt Engineering Basics** · IBM (Jul 2025) · Credential ID: K8AQJKM2E9GY [Show credential](#)
- Generative AI with Large Language Models** · Amazon Web Services (Jul 2025) · Credential ID: A3COZZP9ND79 [Show credential](#)
- Generative AI for Everyone** · DeepLearning.AI (Jun 2025) · Credential ID: 6YQMP55LR8JX [Show credential](#)

CORE SKILLS

.NET Backend & API Engineering

.NET 8 • C# • ASP.NET Core • Web API • Microservices • Entity Framework Core

Distributed & Event-Driven Systems

Kafka • RabbitMQ • Azure Service Bus • Event-Driven Architecture • Event Sourcing • Marten (PostgreSQL)

Azure Cloud & DevOps Delivery

Azure App Service • Azure Container Apps • Azure SQL • Blob Storage • Azure Key Vault • Application Insights

AI & LLM Product Integration

Azure OpenAI • Generative AI Integration • Prompt Engineering • LLM Workflows • AI-assisted Product Features • AI Production Readiness

Frontend & Product Interfaces

React • Next.js • Angular • TypeScript • Tailwind CSS • JavaScript

Architecture, Data & Quality

Domain-Driven Design (DDD) • CQRS • Clean Architecture • Vertical Slice Architecture • MediatR • SOLID Principles

This PDF is a snapshot generated in July 2026.
